

# **Election Process Resolution**

## **Precinct Based Polling**

**Whereas** countywide polling makes elections more difficult to audit;

**Whereas** wireless networks can be unreliable at polling locations, causing electronic poll books to lag, and allowing for voters to cast a vote in multiple locations;

**Whereas** countywide polling increases the chances of voters being issued an incorrect ballot style;

**Be it Resolved** that an addition should be made to RPT Platform Plank 242 stating, "Requiring precinct based polling, eliminating countywide polling."
